Give a friend access to the tracker

In addition to tracking links and operator links, it is possible to provide access to your trackers to other accounts on livegpstracks.com.

Another user will **be able** to:

- See the tracker in the device panel of your account next to your own trackers
- Watch the movement of the tracker in real time
- View tracks (according to the tariff of the account to which the tracker is connected)
- Set geo-fences and notifications
- Set proximity zones

Another user will not be able to:

- See the tracker in "Manage trackers" of your account
- Delete or change tracker parameters (name, icon, time zone, etc.)
- See any financial transactions on the tracker (balance replenishment, fee deduction, SMS, etc.)
- Create tracking links and include the tracker in operator links
- Give access to the tracker to your friendly accounts
- Build Reports

To grant access to a friend:

- \rightarrow Add another account as a friend. How to do this can be found in this article.
- \rightarrow Go to the settings of the GPS monitoring section and open the trackers management tab
- \rightarrow Next to each tracker is an icon in the form of a person. Click on it.
