How to use the platform for free

The “**Free**” plan is activated immediately after registering an account on the platform and is available to any user.

First of all, the free plan is intended for familiarization with the system. It provides basic monitoring capabilities. There are limits on the number of available options. For a detailed set of features, see the plan&pricing.

For individuals, the use of the free plan is possible only within one account. If the number of user's trackers exceeds the account limit set by the plan, the creation of additional free accounts is prohibited.

For legal entities, the use of the free plan is allowed only as part of the initial short-term familiarization with the system and only within one free account. Permanent use of the free plan to support business processes is prohibited.
